

FLT Blank Application Form

This blank form was created to help you start drafting the answers to the application questions. We recommend that you use this form to draft your answers and only write or copy your answers in the online application when you are ready to submit. You can print and handwrite on this form, or you can type your answers and then copy to the application.

- Please select all research priorities that apply to your application.
 - List to select:
 - Weed Suppression
 - Soil Health
 - Insect pest suppression
 - Organic crop variety and seed trials
 - Organic livestock breeds and management
 - Maintaining or improving yields
 - Cover Crops
 - Disease suppression
- Remember to review OFRF's Farmer's Guide to On-Farm Research before filling out this next section of the application. Additionally, see the example provided in the application page to get a sense of the type of information we are requesting.

Please share your ideas about your potential on-farm trial. Make sure to respond to each of these questions with as much detail as possible.

- What ideas or research questions are you interested in testing on your farm?
(40-100 words recommended)

- Explain why testing these ideas or questions is important to your farm (40-100 words recommended)

- Describe any past observations and/or research you may have done on these questions/ideas, as well as any connections with research or extension professionals that may provide you additional support. (40-100 words recommended)

- What treatments or practices would you like to compare in your on-farm trial?

- List any measurements that would help you answer your questions.

- What materials do you think you may need to complete this research?

- What do you think are the biggest challenges for you to conduct and successfully complete this trial, and how could you manage these challenges? (40-100 words recommended)

- If selected, in what period of time (in months) will your on-farm trial run?
Example: May to July.
